## Creature Feature

Chose any animal you have seen today and complete the following:

Scientific name

Common name

Describe what I look like

Draw me

## Creature feature continued...

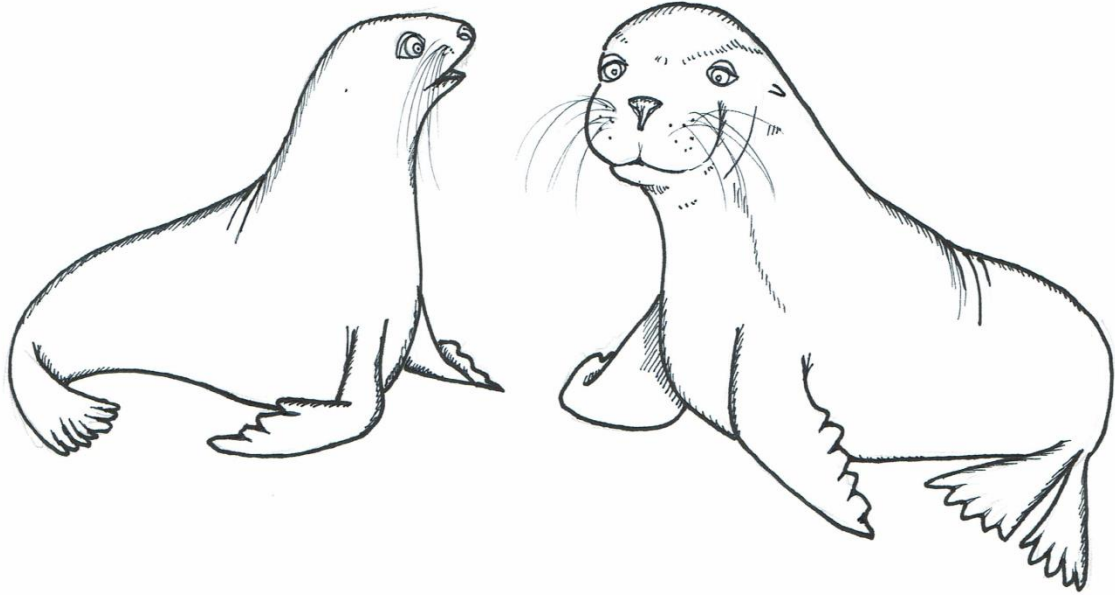

What is my habitat?

What do I eat?

Threats to me?

Interesting fact:

## Sea Lion or Seal?

---

What are the 3 main differences between sea lions and seals?

1.

2.

3.

# Seal Island Wildlife Cruise

Pied Cormorants are one of the many species of birds which nest in the Shoalwater Islands Marine Park. They have semi water absorbent feathers - this means that when they go into the water, their feathers absorb some of this water. This makes the birds heavier and allows them to dive to great depths to catch fish. On the other hand, a Silver Gull has water resistant feathers.

Look at the two pictures of a Pied Cormorant and Silver Gull in the water and compare the differences:

---

---

What advantages would the Pied Cormorant have over the Silver Gull? \_\_\_\_\_

---

## Adaptations

An adaptation is a way an animal's body helps it survive or live in its environment. Choose 5 animals in the Shoalwater Islands Marine Park and list 1 adaptation they have and how this helps them

<b>Species</b>	<b>Adaptation</b>	<b>How it helps</b>
E.g. Pied Cormorant	Semi-water absorbent feathers	Allows bird to dive to around 24m to fish for food
